

Lee's Pharm Cardiovascular Products Meeting of the 30th GW-ICC

On October 11th, 2019, Lee's Pharmaceutical Holdings Ltd. ("Lee's Pharm" or "the Group") successfully hosted "Leading the Future - Lee's Pharm Cardiovascular Products Meeting", a satellite meeting at the China National Convention Center during the 30th Great Wall International Congress of Cardiology (GW-ICC). Our satellite meeting was one of the most popular meetings this year.

Professor Ma Changsheng of Capital Medical University and current Director of the Cardiology Department at Beijing Anzhen Hospital was invited as the Chairman. Along with distinguished guest speakers, Professor Cheng Wenli of Capital Medical University and current Director of the Hypertension Department at Beijing Anzhen Hospital and Professor Wu Haiying of the Chinese Academy of Medical Sciences Fuwai Hospital, together they lectured on the applications of Aliskiren (Rasilez®) and Lacadipine hydrochloride (Zanidip®) in treating hypertension.

During the GW-ICC, the Group set up a special booth promoting our extensive series of cardiovascular products, including: Livaracine®, Rasilez®, Zanidip®, Remodulin®, Slounase®, and Ferplex®, and received large amounts of expert's inquiries.
