

## HKSTP InnoAcademy — Technology Leaders of Tomorrow programme

On October 7th, 2020, Hong Kong Science and Technology Parks Corporation (HKSTP) announced the establishment of “HKSTP InnoAcademy” and the launch of “Technology Leaders of Tomorrow” (TLT) programme. Lee's Pharmaceutical Holdings Ltd. ("Lee's Pharm" or "the Group") was one of the participating partner companies which aims to incubate the future leaders in the Biomedical Technology field.

Eight high-potential talents were selected from the overwhelming number of applications for the first batch of the “Technology Leaders of Tomorrow” programme, who would be undergoing a 26-month training journey in the partner companies. With the comprehensive continuing on-the-job training, it is believed to boost the leadership potential among the talents, which will eventually promote the proliferation of the Hong Kong's innovation and technology (I&T) industry and hence its competitiveness.

Two out of the eight future leaders would be granted the placement opportunities in Lee's Pharm and be mentored by our R&D leaders, Dr. Li Lok-Yee Mandy and Dr. Wong Sze-Ka respectively. The Group's CEO Dr. Li Xiaoyi stated that talents were acquired through the programme. They were expected to apply the knowledge learnt and get familiarized with the research and development of drugs. Hopefully more outstanding talents were appealed to enter the industry in the long run.
