

Lee's Pharm attended the Rare Diseases Conference of Guangdong Medical Association

Released on 7 Jun 2021

Hong Kong, May 29, 2021, the 8th Rare Diseases Academic Conference of Guangdong Medical Association, hosted by Rare Diseases Branch of Guangdong Medical Association and Guangzhou Women and Children's Medical Center, organized by Guangdong Medical Association, was successfully held via both virtually and on-site. Lee's Pharmaceutical Holdings Limited ("Lee's Pharm" or "the Group") participated in the conference.

Healthcare experts and professionals of rare diseases organizations from Beijing, Chengdu, Guangzhou, Shenzhen etc. were gathered to discuss in the aspects of healthcare support, medication system and treatment development of rare diseases.

The mission of Lee's Pharm is to become a successful biopharmaceutical group in Asia providing innovative products to combat diseases, as well as improving health and quality of life for rare disease patients. During this conference, the Group shared the history of the research and development process of product Treprostinil (treatment of pulmonary arterial hypertension) and a newly launched product -- Sodium Phenylbutyrate (treatment of hyperammonemia in urea cycle disorders). The success of these two products has enhanced the credibility and reputation of the Group in the therapeutic focus for its rare disease development.
