— Bringing hope to rare disease patients — Lee’s Pharm
participated in the Multidisciplinary Expert Seminar on Urea Cycle Disorders**

Released on 24 Jun 2021

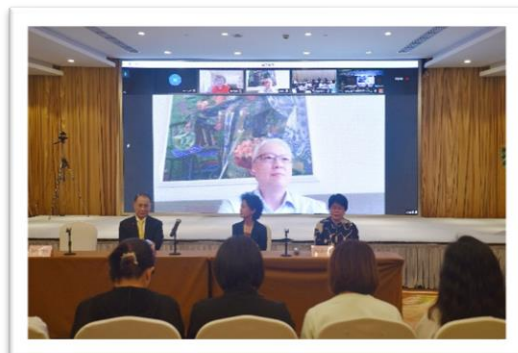

Hong Kong, June 19, 2021, the Multidisciplinary Expert Seminar on Urea Cycle Disorders, organized by the Shanghai Foundation for Rare Disease and the rare disease branch of the Shanghai Medical Association, was successfully held in Merry Hotel Shanghai. Lee’s Pharmaceutical Holdings Limited ("Lee’s Pharm" or "the Group") participated in the Seminar and shared the research and development achievements of the Group on rare diseases.

The seminar was held by Professor Li Dingguo, the Chairman of the Shanghai Foundation for Rare Disease and presented by Dr. Yang Yanling, Department of Pediatrics, Peking University First Hospital. Nearly 38 experts in rare diseases and professionals of rare disease organizations from 13 provinces of China and 8 areas of expertise, were participated in this seminar.

Lee’s Pharm keep striving ahead and caring for lives. During the seminar, Feng Yi, the Senior Director of Rare Diseases Department of the Group introduced about the prevention and treatment of rare diseases, strategic planning and the future goals of the Group. The Group has committed to the development of pharmaceutical products for rare diseases, established local and international platform for academic exchange, as to

provide Chinese doctors with educational training and international interflow. By enhancing the quality of medical services towards rare diseases in China, that will benefit more patients.

There was a media section for interviewing the experts who attended the seminar. “I have been working on the aspect of rare diseases after introducing Levocarnitine since 2003. As a founder of a pharmaceutical company and a scientist as well, I should take on social responsibility to improve public welfare. The resolute sentiment of Professor Li Dingguo, the Chairman of the Shanghai Foundation for Rare Disease and Professor Zhang Hongyu from the Peking Union Medical College Hospital encouraged me to keep striking for the mission of drug development in rare diseases. From the success of Levocarnitine, Treprostinil to Sodium Phenylbutyrate, Lee’s will continue exploring the journey for rare diseases. Rare Disease is rare, but love and care is everywhere.” Dr. LI Xiaoyi, the founder and director of Lee’s Pharm said.
